

ASIA-EUROPE INDUSTRIAL CONNECTIVITY IN TIMES OF CRISIS - VOLUME 16 - INNOVATION AND TECHNOLOGY SET

Contribution de Louis-Caleb Remanda dans l'ouvrage Asia-Europe Industrial Connectivity in Times of Crisis, Volume 16 - Innovation and Technology Set by Chantal Ammi

ISTE Publishing Knowledge - WILEY

Description

The main objective of this book is to offer an overview and a critical assessment of current connectivity issues in Asia and Europe, seen from an industrial perspective. Critical insights into the contemporary debate on connectivity during times of crisis, which has led to significant economic and social disruptions, are offered throughout the book. European and Asian countries seek to “bounce forward” and not “bounce back” as they

navigate the complex economic recovery process. Innovation and investment emerge as critical players to help an economic recovery that shifts towards a more resilient and environmentally friendly approach, to ensure that the world economies stay connected.

The global health crisis has revealed that, more than ever before, ubiquitous connectivity, underpinned by pioneering innovation, is a must. As such, governments worldwide need to ensure that businesses and societies emerge stronger and more resilient from existing and emerging crises by laying solid foundations that help to circumnavigate future disruptions of a global magnitude.

Contents

1. Japan’s Plans for Society 5.0 – A Global Concept, an Isolated Solution or Utopia? Jana-Larissa Grzeszkowiak.
2. European Union–Japan Relations: A Business System Overview of Free Trade Agreements (FTAs) Louis-Caleb Remanda.
