## **About this Book**

This edited volume discusses digital democracy at the local level in Europe. Contrasting the political discourse surrounding participatory digital democracy with actual experiences of implementation, the book provides a wholistic view of digital democracy across Western, Central, and Eastern Europe. The book is divided into three parts. Chapters in Part I analyze discourses about participatory democracy in Europe. Chapters in Part II provide case studies of digital democracy practices at the local level in the EU. Chapters in Part III discuss the risks and challenges associated with digital democracy. Written by a panel of international, interdisciplinary experts, this volume will be of interest to researchers, students, and practitioners across public administration, political science, economics, management, and sociology.
